1 Corporate Information

Centum T & S Group ("T & S" or "the Company" or "the Holding Company") is established since 1994 and located in France. It has subsidiaries in Canada. The Company along with its subsidiaries and its associates (hereinafter collectively referred to as "the Group"), are primarily involved in the design and manufacturing of energy conversion and storage systems and information management systems. The industry segments are Transport & Automotive, Defense & Aerospace, Industrial & Energy, Medical and Communication.

The consolidated financial statements were approved by the Board of Directors and authorised for issue in accordance with a resolution of the directors on March 31st, 2025.

2 Significant accounting policies

The significant accounting policies applied by the Group in the preparation of its consolidated financial statements are listed below. Such accounting policies have been applied consistently to all the periods presented in these consolidated financial statements, unless otherwise indicated.

2.1 Basis of Consolidation

The consolidated financial statements of the Group have been prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The consolidated financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities (refer accounting policy regarding financial instruments) which have been measured at fair value.

The functional and presentation currency of the Group is Euro which is the currency of the primary economic environment in which the Group operates.

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries as at March 31, 2026. Control is achieved when the Group is exposed, has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the
- Rights arising from other contractual arrangements.
- The Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases control of the subsidiary.

Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to that group member's financial statements in preparing the consolidated financial statements to ensure conformity with the group's accounting policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of the parent company, i.e., year ended on 31 March. When the end of the reporting period of the parent is different from that of a subsidiary, the subsidiary prepares, for consolidation purposes, additional financial information as of the same date as the financial statements of the parent to enable the parent to consolidate the financial information of the subsidiary, unless it is impracticable to do so.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

Consolidation procedure:

- a) Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of a subsidiary are based on the amounts of the assets and liabilities recognised in the consolidated financial statements at the acquisition date.
- b) Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary. Business combinations policy explains how to account for any related goodwill.
- c) Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the consolidated financial statements. IAS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.
- d) Non-controlling interest represents that part of the total comprehensive income and net assets of subsidiaries attributable to interests which are not owned, directly or indirectly, by the Parent Company.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost
- Derecognises the carrying amount of any non-controlling interests
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Recognises any surplus or deficit in profit or loss
- Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

2.2 Changes in accounting policies and disclosures:

New standards and amendments:

(i) IFRS 17 Insurance Contracts

IFRS 17 Insurance Contracts is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. IFRS 17 replaces IFRS 4 Insurance Contracts. IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them as well as to certain guarantees and financial instruments with discretionary participation features; a few scope exceptions will apply. The overall objective of IFRS 17 is to provide a comprehensive accounting model for insurance contracts that is more useful and consistent for insurers, covering all relevant accounting aspects. IFRS 17 is based on a general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

The new standard had no impact on the Group's consolidated financial statements.

(ii) Definition of Accounting Estimates - Amendments to IAS 8

The amendments to IAS 8 clarify the distinction between changes in accounting estimates, changes in accounting policies and the correction of errors. They also clarify how entities use measurement techniques and inputs to develop accounting estimates. The amendments had no impact on the Group's consolidated financial statements.

(iii) Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

The amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements provide guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures. The amendments have had an impact on the Group's disclosures of accounting policies, but not on the measurement, recognition or presentation of any items in the Group's financial statements.

(iv) Deferred Tax related to Assets and Liabilities arising from a

The amendments to IAS 12 Income Tax narrow the scope of the initial recognition exception, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences such as leases and decommissioning liabilities. The amendments had no impact on the Group's consolidated financial statements.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

(v) International Tax Reform—Pillar Two Model Rules – Amendments to IAS 12

The amendments to IAS 12 have been introduced in response to the OECD's BEPS Pillar Two rules and include:

- A mandatory temporary exception to the recognition and disclosure of deferred taxes arising from the jurisdictional implementation of the Pillar Two model rules; and
- Disclosure requirements for affected entities to help users of the financial statements better understand an entity's exposure to Pillar Two income taxes arising from that legislation particularly before its effective date.

The mandatory temporary exception – the use of which is required to be disclosed – applies immediately. The remaining disclosure requirements apply for annual reporting periods beginning on or after 1 January 2025, but not for any interim periods ending on or before 31 December 2025.

The amendments had no impact on the Group's consolidated financial statements.

2.3 Significant accounting policies

a) Business combination and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organised workforce with the necessary skills, knowledge, or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired in a business combination are measured at the basis indicated below:

- Deferred tax assets or liabilities, and the assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IFRS 12 Income Tax and IFRS 19 Employee Benefits respectively.
- Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with IFRS 12- Income Tax.
- Liabilities or equity instruments related to share based payment arrangements of the acquiree or share – based payments arrangements of the Group entered into to replace share based payment arrangements of the acquiree are measured in accordance with IFRS 2 Share-based Payments at the acquisition date.
- Assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 Non-current Assets held for Sale and Discontinued Operations are measured in accordance with that standard.
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss or OCI, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is within the scope of IAS 109 Financial Instruments, is measured at fair value with changes in fair value recognised in profit or loss in accordance with IAS 109. If the contingent consideration is not within the scope of IAS 109, it is measured in accordance with the appropriate IAS and shall be recognised in profit or loss. Contingent consideration that is classified as equity is not re-measured at subsequent reporting dates and subsequent its settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the Group recognises the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

b) Investment in associate

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The considerations made in determining whether significant influence are similar to those necessary to determine control over the subsidiaries.

The Group's investment in its associate is accounted for using the equity method after making necessary adjustments to achieve uniformity in application of accounting policies. Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is not tested for impairment individually.

The statement of profit and loss reflects the Group's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

When the Group's share of losses of an associate equals or exceeds its interest in the associate (which includes any long term interest that, in substance, forms part of the Group's investment in the associate), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate. If the associate subsequently reports profits, the Group resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

The aggregate of the Group's share of profit or loss of an associate is shown on the face of the statement of profit and loss.

The financial statements of the associate are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, and then recognises the loss as 'Share of profit of an associate' in the statement of profit or loss.

Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

c) Current versus non-current classification

The Group presents assets and liabilities in the consolidated balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- i. Expected to be realised or intended to be sold or consumed in normal operating cycle,
- ii. Held primarily for the purpose of trading,
- iii. Expected to be realised within twelve months after the reporting period, or
- iv. Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- i. It is expected to be settled in normal operating cycle,
- ii. It is held primarily for the purpose of trading,
- iii. It is due to be settled within twelve months after the reporting period, or
- iv. There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The terms of the liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities. Advance tax paid is classified as non-current assets.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents.

d) Fair value measurement

The Group measures financial instruments, such as, derivatives at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- a) In the principal market for the asset or liability, or
- b) In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described as follows based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1- Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2- Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and
- Level 3- Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Disclosures for valuation methods, significant estimates and assumptions
- Quantitative disclosures of fair value measurement hierarchy
- Investment in unquoted equity shares
- Financial instruments (including those carried at amortised cost)

e) Revenue Recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has generally concluded that it is the principal in its revenue arrangements because it typically controls the goods or services before transferring them to the customer.

The specific recognition criteria described below must also be met before revenue is recognised.

Sale of products and services

Revenue from sale of products is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the products. Revenue from sale of services is recognised as the service is performed and there are no unfulfilled obligations.

The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated if any. In determining the transaction price for the sale of goods, the Group considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer (if any).

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of goods sold and services rendered is net of variable consideration on account of various discounts and schemes offered by the Group as part of the contract. The variable consideration is estimated based on the expected value of outflow. Revenue (net of variable consideration) is recognised only to the extent that it is highly probable that the amount will not be subject to significant reversal when uncertainty relating to its recognition is resolved.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

Fixed price contracts

These contracts which have a performance obligation either provide for the fixed price for the entire project or a price defined in a framework agreement for each type of service ordered by the customer as the project is performed. Revenues from fixed price contracts is recognised based on the stage of completion and the expected profit on completion. Depending on the contracts, the degrees of progress is determined according to the input method (notably according to the costs borne by the project and hours spent) or the output method (notably according to the deliverables made). In the event of an unexpected excess of total contract costs over total contract revenues, the expected losses on completion are provisioned.

Time and material contracts

These contracts, which are subject to best efforts clause, have a variable price determined according to the time spent and the seniority of the staff employed for these projects. Revenues generated by time and material contracts is recognised as the services are performed.

Centum T & S Group SA
Notes to the consolidated financial statements for the year ended March 31, 2026
Management fees income

Income from management fees is recognised as per the terms of the agreement on the basis of services rendered.

Interest income

For all financial instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Group estimates the expected cash flows considering all the contractual terms of the financial instrument but does not consider the expected credit losses. Interest income is included in finance income in the statement of profit and loss.

Contract balances

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional. Contract assets are transferred to receivables when the rights become unconditional and contract liabilities are recognised as and when the performance obligation is satisfied.

Contract assets are subject to impairment assessment. Refer to accounting policies on impairment of financial assets in section of Financial instruments.

Trade receivables

A receivable is recognised if an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (q) Financial instruments.

Contract liabilities

A contract liability is recognised if a payment is received or a payment is due (whichever is earlier) from a customer before the Group transfers the related goods or services. Contract liabilities are recognised as revenue when the Group performs under the contract (i.e., transfers control of the related goods or services to the customer).

f) Government grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

g) Taxes on income

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income. Current income tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax is recognised in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the corresponding amount used for taxation purposes.

A deferred tax liability is recognised based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted, or substantively enacted, by the end of the reporting period. Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the assets can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities; and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority.

h) Non-current assets held for sale/ disposal

The Group classifies non-current assets as held for sale / disposal if their carrying amounts will be recovered principally through a sale rather than through continuing use. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the sale expected within one year from the date of classification.

For these purposes, sale transactions include exchanges of non-current assets for other non-current assets when the exchange has commercial substance. The criteria for held for sale classification is regarded met only when the assets or disposal group is available for immediate sale in its present condition, subject only to terms that are usual and customary; sales of such assets, its sale is highly probable; and it will genuinely be sold, not abandoned. The Group treats sale of the asset to be highly probable when:

- a) The appropriate level of management is committed to a plan to sell the asset,
- b) An active programme to locate a buyer and complete the plan has been initiated,
- c) The asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value,
- d) The sale is expected to qualify for recognition as a completed sale within one year from the date of classification, and
- e) Actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Non-current assets held for sale are measured at the lower of their carrying amount and the fair value less costs to sell. Assets and liabilities classified as held for sale are presented separately in the consolidated balance sheet.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

1) Property, plant and equipment

Capital work in progress includes cost of property, plant and equipment under installation / under development net of accumulated impairment loss, if any, as at the balance sheet date. Plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognised in profit or loss as incurred.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit and loss during the reporting period in which they are incurred.

The Group identifies and determines cost of each component/ part of the asset separately, if the component/ part has a cost which is significant to the total cost of the asset having useful life that is materially different from that of the remaining asset. These components are depreciated over their useful lives; the remaining asset is depreciated over the life of the principal asset.

The Group provides depreciation based on estimated useful lives of the property, plant and equipment as determined by the management of such subsidiaries and associates. In view of different sets of environment in which such foreign subsidiaries and associates operate in their respective countries, depreciation is provided based on local laws and management estimates. These entities follow straight line method of depreciation spread over the useful life of each individual asset.

Land is carried at historical cost and is not depreciated. Leasehold improvements are depreciated over the period of lease or estimated useful life, whichever is lower, on straight line basis. Machinery spares are depreciated on a systematic basis over the period of the remaining useful life of the fixed assets for which they are utilised.

The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

The estimated useful lives of items of property, plant and equipment for the current and comparative periods are as follows:

Asset categories	Years
Plant & equipment	3-5 years
Electrical installation	5-10 years
Furniture & fixtures	5-10 years
Office equipment	3-8 years
Computer	3-5 years

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognised.

j) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, if any. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period with the effect of a change in the estimate being accounted for on a prospective basis. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognised.

A summary of the policies applied to the Group's intangible assets is, as follows:

Intangible assets	Useful lives	Amortisation method used	Internally generated or acquired
Goodwill (including goodwill arising on consolidation)	Indefinite	No amortisation	Acquired
Customer relationship	Definite (8 years)	Straight-line basis	Acquired
Computer software	Definite (5 years)	Straight-line basis	Acquired
Intellectual property rights	Definite (8 years)	Straight-line basis	Acquired

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

k) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or service are capitalized as part of cost of such asset until such time as the assets are substantially ready for their intended use.

All other borrowing costs are recognized as an expense in the year in which they are incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

l) Leases

The Group has lease contracts for office spaces various items of plant and machinery, computers and other equipments. The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities through making lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets:

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liability recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (n) Impairment of non-financial assets.

ii) Lease Liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

m) Inventories

Inventories are valued at lower of cost and net realisable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.

Costs incurred in bringing each product to its present location and condition are accounted for as follows:

- a) Raw materials and stores and spares: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition.
- b) Finished goods and work in progress: cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, including borrowing costs.

Cost of raw materials, stores and spares work-in-progress and finished goods is determined on a weighted average basis.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

n) Impairment of non-financial assets

As at the end of each accounting year, the Group reviews the carrying amounts of its PPE, intangible assets, including goodwill and investment in associate to determine whether there is any indication that those assets have suffered an impairment loss. If such indication exists, the said assets are tested for impairment so as to determine the impairment loss, any. Goodwill and the intangible assets with indefinite life are tested for impairment each year.

Impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount. Recoverable amount is determined:

- i) in the case of an individual asset, at the higher of the fair value less costs of disposal and the value in use; and
- ii) in the case of a cash generating unit (a group of assets that generates identified, independent cash flows), at the higher of the cash generating unit's net fair value less costs of disposal and the value in use.

(The amount of value in use is determined as the present value of estimated future cash flows from the continuing use of an asset and from its disposal at the end of its useful life. For this purpose, the discount rate (pre-tax) is determined based on the weighted average cost of capital of the company suitably adjusted for risks specific to the estimated cash flows of the asset).

For this purpose, a cash generating unit is ascertained as the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.

If recoverable amount of an asset (or cash generating unit) is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount. For this purpose, the impairment loss recognised in respect of a cash generating unit is allocated first to reduce the carrying amount of any goodwill allocated to such cash generating unit and then to reduce the carrying amount of the other assets of the cash generating unit on a pro-rata basis.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Group extrapolates cash flow projections in the budget using steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country in which the Group operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the consolidated statement of profit and loss.

o) Provisions and contingent liabilities

General

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the consolidated statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

If the Group has a contract that is onerous, the present obligation under the contract is recognised and measured as a provision. However, before a separate provision for an onerous contract is established, the Group recognises any impairment loss that has occurred on assets dedicated to that contract.

An onerous contract is a contract under which the unavoidable costs (i.e., the costs that the Group cannot avoid because it has the contract) of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it. The cost of fulfilling a contract comprises the costs that relate directly to the contract (i.e., both incremental costs and an allocation of costs directly related to contract activities).

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Group does not recognize a contingent liability but discloses its existence in the consolidated financial statements.

Provisions and contingent liability are reviewed at each balance sheet.

Decommissioning Liability

Decommissioning costs are provided at the present value of expected costs to settle the obligation using estimated cash flows and are recognised as part of the cost of the particular asset. The cash flows are discounted at a current pre-tax rate that reflects the risks specific to the decommissioning liability. The unwinding of the discount is expensed as incurred and recognised in the consolidated statement of profit and loss as a finance cost. The estimated future costs of decommissioning are reviewed annually and adjusted as appropriate. Changes in the estimated future costs or in the discount rate applied are added to or deducted from the cost of the asset. The impact of climate-related matters on remediation of environmental damage is considered with determining the decommissioning liability on the manufacturing facility.

p) Employment benefits

Post retirement obligations

The Company participates in various employee benefit plans. Post-employment benefits are classified as either defined contribution plans or defined benefit plans.

Under a defined contribution plan, the Company's only obligation is to pay a fixed amount with no obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits. The related actuarial and investment risks fall on the employee. The expenditure for defined contribution plans is recognized as expense during the period when the employee provides service.

Under a defined benefit plan, it is the Company's obligation to provide agreed benefits to the employees. The related actuarial and investment risks fall on the Company.

The Company has the following employee benefit plans:

Provident fund & employee state insurance : The company makes a contribution towards provident fund and employee's state insurance which is a defined contribution scheme, is charged to the statement of profit and loss in the period in which the employee renders services.

The Group does not have any post employment benefits that are classified as defined benefit plans

q) Financial instruments

Financial assets and financial liabilities are recognised when the Group becomes a party to the contract embodying the related financial instruments. All financial assets, financial liabilities and financial guarantee contracts are initially measured at transaction cost and where such values are different from the fair value, at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit and loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability. Transaction costs directly attributable to the acquisition of financial assets and financial liabilities at fair value through profit and loss are immediately recognised in the consolidated statement of profit and loss.

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost and fair value through profit or loss. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price as disclosed in section 2.3.(e) Revenue recognition.

In order for a financial asset to be classified and measured at amortised cost, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

Investment in equity instruments issued by associates are measured at cost less impairment.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial instrument and of allocating interest income or expense over the relevant period. The effective interest rate is the rate that exactly discounts future cash receipts or payments through the expected life of the financial instrument, or where appropriate, a shorter period.

(i) Financial assets

Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets measured at fair value

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and to sell these financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial asset not measured at amortised cost or at fair value through other comprehensive income is carried at fair value through the statement of profit and loss.

For financial assets maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

Impairment of financial assets excluding investment in associate

Loss allowance for expected credit losses is recognised for financial assets measured at amortised cost and fair value through the statement of profit and loss.

The Group recognises impairment loss on trade receivables using expected credit loss model, which involves use of provision matrix constructed on the basis of historical credit loss experience as permitted under IAS 109 – Financial Instruments.

For financial assets whose credit risk has not significantly increased since initial recognition, loss allowance equal to twelve months expected credit losses is recognised. Loss allowance equal to the lifetime expected credit losses is recognised if the credit risk on the financial instruments has significantly increased since initial recognition.

For financial assets maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

De-recognition of financial assets

The Group de-recognises a financial asset only when the contractual rights to the cash flows from the financial asset expire, or it transfers the financial asset and the transfer qualifies for de-recognition under IAS 109.

If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay.

If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises any collateralised borrowing for the proceeds received.

On de-recognition of a financial asset in its entirety, the difference between the carrying amount measured at the date of de-recognition and the consideration received is recognised in the consolidated statement of profit or loss.

(ii) Financial liabilities and equity instruments

Classification as debt or equity

Financial liabilities and equity instruments issued by the Group are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

Centum T & S Group SA
Notes to the consolidated financial statements for the year ended March 31, 2026
Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. Equity instruments are recorded at the proceeds received, net of direct issue costs.

Financial Liabilities

Financial liabilities are initially measured at fair value, net of transaction costs, and are subsequently measured at amortised cost, using the effective interest rate method where the time value of money is significant. Interest bearing bank loans, overdrafts and issued debt are initially measured at fair value and are subsequently measured at amortised cost using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in the consolidated statement of profit and loss.

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

a) Financial guarantee contracts

Financial guarantee contracts issued by the Group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of IAS 109 and the amount recognised less cumulative amortisation.

b) De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the consolidated statement of profit and loss.

Off-setting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

r) Cash and cash equivalents

Cash and cash equivalent in the consolidated balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, that are readily convertible to a known amount of cash and which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, as they are considered an integral part of the Group's cash management.

s) Foreign currencies

The Group's consolidated financial statements are presented in EUR, which is also the Holding company's functional currency. For each entity the Group determines the functional currency and items included in the financial statements of each entity are measured using that functional currency. The Group uses the direct method of consolidation and on disposal of a foreign operation the gain or loss that is reclassified to profit or loss reflects the amount that arises from using this method.

Transactions and balances:

Transactions in foreign currencies are initially recorded by the Group's entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition. However, for practical reasons, the Group uses an average rate if the average approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit or loss with the exception of the following:

- Exchange differences arising on monetary items that form part of a reporting entity's net investment in a foreign operation are recognised in profit or loss in the separate financial statements of the reporting entity or the individual financial statements of the foreign operation, as appropriate. In the financial statements that include the foreign operation and the reporting entity (e.g., consolidated financial statements when the foreign operation is a subsidiary), such exchange differences are recognised initially in OCI. These exchange differences are reclassified from equity to profit or loss on disposal of the net investment.
 - Exchange differences arising on monetary items that are designated as part of the hedge of the Group's net investment in a foreign operation. These are recognised in OCI until the net investment is disposed of, at which time, the cumulative amount is reclassified to profit or loss.
- Tax charges and credits attributable to exchange differences on those monetary items are also recorded in OCI.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

Centum T & S Group SA
Notes to the consolidated financial statements for the year ended March 31, 2026

Group companies:

On consolidation, the assets and liabilities of foreign operations are translated into INR at the rate of exchange prevailing at the reporting date and their statements of profit or loss are translated at exchange rates prevailing at the dates of the transactions. For practical reasons, the Group uses an average rate to translate income and expense items, if the average rate approximates the exchange rates at the dates of the transactions. The exchange differences arising on translation for consolidation are recognised in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is recognised in the consolidated statement of profit or loss.

Any goodwill arising in the acquisition/ business combination of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operation and translated at the spot rate of exchange at the reporting date.

Gain or loss on a subsequent disposal of any foreign operation excludes translation differences that arose before the date of transition but includes only translation differences arising after the transition date.

f) Research and development expenditure

Research costs are expensed as incurred. Development expenditure incurred on an individual project is recognized as an intangible asset when the Group can demonstrate all the following:

- i. The technical feasibility of completing the intangible asset so that it will be available for use or sale
- ii. Its intention to complete the asset
- iii. Its ability to use or sell the asset
- iv. How the asset will generate future economic benefits
- v. The availability of adequate resources to complete the development and to use or sell the asset
- vi. The ability to measure reliably the expenditure attributable to the intangible asset during development.

Following the initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized on a straight line basis over the period of expected future benefit from the related project. Amortization is recognized in the consolidated statement of profit and loss. During the period of development, the asset is tested for impairment annually.

u) Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss attributable to equity holder of the parent by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders of the parent company and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

j) Non-current assets held for sale and discontinued operations

The Group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale rather than through continuing use.

Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

For these purposes, sale transactions include exchanges of non-current assets for other non-current assets when the exchange has commercial substance. The criteria for held for sale classification is regarded met only when the assets or disposal group is available for immediate sale in its present condition, subject only to terms that are usual and customary; sales of such assets (or disposal groups), its sale is highly probable; and it will genuinely be sold, not abandoned. The group treats sale of the asset or disposal group to be highly probable when:

- ▶ The appropriate level of management is committed to a plan to sell the asset (or disposal group),
- ▶ An active programme to locate a buyer and complete the plan has been initiated (if applicable),
- ▶ The asset (or disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value,
- ▶ The sale is expected to qualify for recognition as a completed sale within one year from the date of classification, and
- ▶ Actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

Property, plant and equipment and intangible are not depreciated, or amortised assets once classified as held for sale.

Assets and liabilities classified as held for sale are presented separately from other items in the balance sheet.

Discontinued operations are excluded from the results of continuing operations and are presented separately as 'profit or loss before tax from discontinued operations,' 'expense/(income) of discontinued operations,' and 'profit or loss after tax from discontinued operations,' in the statement of profit and loss.

Additional disclosures are provided in Note 43. All other notes to the financial statements mainly include amounts for continuing operations, unless otherwise mentioned.

2.4 Standards issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's financial statements are disclosed below. The Group intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

i) Amendments to IFRS 16: Lease Liability in a Sale and Leaseback

In September 2022, the IASB issued amendments to IFRS 16 to specify the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains.

The amendments are effective for annual reporting periods beginning on or after 1 January 2025 and must be applied retrospectively to sale and leaseback transactions entered into at the date of initial application of IFRS 16. Earlier application is permitted and that fact must be disclosed.

The amendments are not expected to have a material impact on the Group's financial statements.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

ii) **Amendments to IAS 1: Classification of Liabilities as Current or Non-current**

In January 2020 and October 2022, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

In addition, a requirement has been introduced to require disclosure when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months. The amendments are effective for annual reporting periods beginning on or after 1 January 2024 and must be applied retrospectively. The Group is currently assessing the impact the amendments will have on current practice and whether existing loan agreements may require renegotiation.

iii) **Supplier Finance Arrangements - Amendments to IAS 7 and IFRS 7**

In May 2023, the IASB issued amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures to clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk.

The amendments will be effective for annual reporting periods beginning on or after 1 January 2025. Early adoption is permitted, but will need to be disclosed.

The amendments are not expected to have a material impact on the Group's financial statements.

2.5 The entities consolidated in the consolidated financial statements are listed below:

		March 31, 2026	March 31, 2025	March 31, 2026	March 31, 2025		
(a) Other associates:							
Ausar Energy SAS	France		0.00%		0.00%	Engaged in the consulting, engineering, research and development in Energy sector.	Equity Method

Notes:

1. Aggregate amount of unquoted investment in associates EUR Nil (March 31, 2025: Nil)
2. The country of incorporation of the above entity is same as its principal place of business.
3. The Group had investment in bonds and trade receivables aggregating to Rs 193.05 million in Ausar Energy SAS ("Ausar"), an associate of Centum T&S Group Société Anonyme (S.A.) as at March 31, 2025. During the year ended March 31, 2023, the Group had entered into a call and put agreement with John Cockerill Renewables SA ("John Cockerill") for divestment of its 30.45% stake in Ausar and full recovery of the aforesaid value of bonds / receivables, after meeting certain performance conditions as stipulated in the agreement. Hence these were considered fully recoverable by the Group.

On February 4, 2025, Ausar was placed in receivership ("Redressement Judiciaire"), under French laws, allowing Ausar to continue to operate, whilst bids will be invited for takeover of Ausar and restructuring of its business and debts/obligations. John Cockerill is the bidder for takeover and has entered into negotiated agreement with management of the group.

Pending final outcome in the matter and settlement of the recovery proceedings, as a matter of prudence, the management had provided for the carrying value of its investment in bonds and trade receivables in Ausar net of recovery from John Cockerill, bidder for takeover, amounting to ₹s 148.32 million and the same had been disclosed as exceptional item in the financial statements for the year ended March 31, 2025.

Further, during the quarter ended June 30, 2025, John Cockerill has agreed to pay an additional amount of Rs. 17.65 million, basis which management has reversed provision, which had been disclosed as an exceptional item in the financial results for the quarter ended June 30, 2025.

32 Earnings per share

Basic EPS amounts are calculated by dividing the profit/ loss for the year attributable to equity shareholders of the parent by the weighted average number of equity shares outstanding during the year. Partly paid equity shares are treated as a fraction of an equity share to the extent that they were entitled to participate in dividends relative to a fully paid equity share during the reporting period.

Diluted EPS amounts are calculated by dividing the profit attributable to equity shareholders by the weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

The following reflects the income and share data used in the basic and diluted EPS computations for continuing operations:

Particulars	For the year ended March 31, 2026	For the year ended March 31, 2025
Profit attributable to equity holders of the parent for basic / diluted earnings per share	(48,38,868)	(45,35,166)
Weighted average number of equity shares used for computing EPS (basic)	6,75,677	6,75,677
Add: Effect of dilutive issues of stock options	-	-
Weighted average number of equity shares used for computing EPS (diluted)	6,75,677	6,75,677
Earnings per share - Basic	(7.16)	(6.71)
Earnings per share - Diluted	(7.16)	(6.71)

*Considering that the Group has incurred losses during the years ended March 31, 2026 and March 31, 2025, the allotment of stock options would decrease the loss per share for the years ended March 31, 2026 and March 31, 2025 and accordingly had not been considered for the purpose of calculation of diluted earnings per share.

33 Significant accounting judgements, estimates and assumptions

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Actual results could differ from those estimates. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

Significant judgements and estimates relating to the carrying values of assets and liabilities include determining control over entities and accounting thereof, impairment of investments in associates, impairment of goodwill, fair value measurement of financial instruments, provision for employee benefits and other provisions, recoverability of deferred tax assets, commitments, contingencies, provision for inventory obsolescence and efforts estimation for revenue recognition.

(i) Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the consolidated financial statements:

(a) Determination of control and accounting thereof:

As detailed in the accounting policy, consolidation principles under IFRS necessitates assessment of control of the subsidiaries independent of the majority shareholding. Consolidation principles under IFRS are different from the previous GAAP, especially with respect to assessment of control of the subsidiaries. Based on the assessment made, the management of the Group believes that it has control over Centum T & S Group SA and its underlying subsidiaries. Further, the management of the Group assessed that it exercises significant influence over Ausar Energy SAS, based on their assessment of the share purchase agreement.

(ii) Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the same can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Refer note 7 and 39 for further disclosures

36 During the year endeds March 31, 2026 and March 31, 2025, no material foreseeable loss was incurred for any long-term contract including derivative contracts.

37 Leases

Group as a lessee

The Group has lease contracts for office facilities and equipment (including vehicles, computer and furniture). The lease term for office facilities is generally 3 to 12 years and for equipment is 2 to 6 years. The Group's obligations under its leases are secured by the lessor's title to the leased assets. The Group also has certain leases of computer and computer equipment with low value. The Group applies 'lease of low value assets' recognition exemption for the leases.

The Group has lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customisation to the leased asset).

The carrying amounts of right-of-use assets recognised and the movements during the year is as follows:

Particulars	(in Euro)

As at March 31, 2025	39,51,025	2,70,252	1,44,585	43,65,861

The carrying amounts of liabilities recognised and the movements during the year is as follows:

Particulars	(in Euro)	
	Amount	
As at April 1, 2024	55,72,848	
Additions to right-of-use asset	-	
Accretion of Interest	1,36,699	
Reversal of lease liabilities on disposal of asset	-	
Payments	(12,48,049)	
As at March 31, 2025	44,61,498	
Additions to right-of-use asset	-	
Accretion of Interest	88,381	
Terminated	(8,94,607)	
Payments	(4,37,201)	
Transferred to liability held for sale	(32,18,071)	
As at March 31, 2026	-	

Particulars	(in Euro)	
	March 31, 2026	March 31, 2025
Current	19,22,735	10,41,437
Non Current	12,95,336	34,20,061
Total	32,18,071	44,61,498

The maturity analysis of lease liabilities are disclosed in Note 42. The effective interest rate for lease liabilities is about 1.6% (depending of the term and the type of asset).

The following are the amounts recognised in statement of profit or loss:

Particulars	(in Euro)	
	March 31, 2026	March 31, 2025
Depreciation expense of right-of-use assets	8,96,592	10,95,514
Interest expense on lease liabilities	88,381	1,36,699

Expenses relating to short-term leases and leases of low-value assets (included in other expenses) (refer note 30)	4,56,106	4,85,005
Total amount recognised in profit or loss	14,41,079	17,17,218

The Group had total cash outflows for leases of EUR in March 31, 2026 Euro 437,201 (March 31, 2025: EUR 1,248,049).

38 Commitments and Contingencies

(a) Estimated amount of contracts remaining to be executed on capital account and not provided for

Particulars	(in Euro)	
	March 31, 2026	March 31, 2025
Estimated amount of contracts remaining to be executed on capital account and not provided for (net of advances)	-	-

(b) Contingent liabilities

In the ordinary course of business, the Group faces claims and assertions by various parties. The Group assesses such claims and assertions and monitors the legal environment on an ongoing basis with the assistance of external legal counsel, wherever necessary. The Group records a liability for any claims where a potential loss is probable and capable of being estimated and discloses such matters in its consolidated financial statements, if material. For potential losses that are considered possible, but not probable, the Group provides disclosure in the consolidated financial statements but does not record a liability in its accounts unless the loss becomes probable.

The following is a description of claims and assertions where a potential loss is possible, but not probable. The Group believes that none of the contingencies described below would have a material adverse effect on the Group's financial condition, results of operation or cash flow.

Contingent liabilities (with details)

Claims against the Company not acknowledged as debts in respect of:

Human resource litigation

Supplier litigation

(in Euro)	
March 31, 2026	March 31, 2025
2,04,618	2,04,618

The Group is subject to legal proceeding and claims, which have arisen in the ordinary course of business. The Group has reviewed all its pending litigations and proceedings and is not carrying provisions for all the above mentioned amounts in its books of account, as the Group's Management is confident of successfully litigating the matters and these are disclosed as contingent liability, where applicable in its consolidated financial statements. The Group's Management does not reasonably expect that these legal actions, when ultimately concluded and determined, will have a material and adverse effect on the Group's results of operations or financial condition.

33 Significant accounting judgements, estimates and assumptions

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenue expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Actual results could differ from those estimates. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

Significant judgements and estimates relating to the carrying values of assets and liabilities include determining control over entities and accounting thereof, impairment of investments in associates, impairment of goodwill, fair value measurement of financial instruments, provision for employee benefits and other provisions, recoverability of deferred tax assets, commitments, contingencies, provision for inventory obsolescence and efforts estimation for revenue recognition.

(i) Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the consolidated financial statements:

(a) Determination of control and accounting thereof:

As detailed in the accounting policy, consolidation principles under IFRS necessitates assessment of control of the subsidiaries independent of the majority shareholding. Consolidation principles under IFRS are different from the previous GAAP, especially with respect to assessment of control of the subsidiaries. Based on the assessment made, the management of the Group believes that it has control over Centum T & S Group SA and its underlying subsidiaries. Further, the management of the Group assessed that it exercises significant influence over Ausar Energy SAS, based on their assessment of the share purchase agreement.

(ii) Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the same can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profit together with future tax planning strategies. Refer note 7 and 39 for further disclosures

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Intangible asset under development

The Group capitalises intangible asset under development for a project in accordance with the accounting policy. Initial capitalisation of costs is based on management's judgement that technological and economic feasibility is confirmed, usually when a product development project has reached a defined milestone according to an established project management model. In determining the amounts to be capitalised, management makes assumptions regarding the expected future cash generation of the project, discount rates to be applied and the expected period of benefits. As at March 31, 2026, the carrying amount of intangible assets under development is Nil. (March 31, 2025: EUR 1,119,398).

Provision for inventory obsolescence

Inventory obsolescence provision are determined using policies framed by the Company and in accordance with the methodologies that the Company deems appropriate to its business. There is a significant level of judgment involved in assessing whether provision for obsolescence for slow moving, excess or obsolete inventory items should be recognized considering orders in hand, expected orders, alternative usage, etc.

Revenue recognition

The group uses the percentage-of-completion method in accounting for its fixed-price contract. Use of the percentage-of-completion method requires the Group to estimate the efforts expended to date as a proportion of the total efforts to be expended. Efforts expended have been used to measure progress towards completion as there is a direct relationship between input and productivity.

Provision for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the expected contract estimates at the reporting date.

Leases - Determining the lease term of contracts with renewal and termination options – Group as lessee and estimating the incremental borrowing rate

The Group determines the lease term as the non-cancellable term of the lease.

The Group has lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customisation to the leased asset)

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available or when the need to be adjusted to reflect the terms and conditions of the lease. The Group estimates the IBR using observable inputs (such as market interest rates) when available and required to make certain entity-specific estimates.

Contingencies

Contingent liabilities may arise from the ordinary course of business in relation to claims against the Group, including legal and contractual claims. By their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence, and potential quantum, of contingencies inherently involve the exercise of significant judgement and the use of estimates regarding the outcome of future events.

Discontinued Operations

Centum T&S Group SA and its subsidiaries has classified as a discontinued operation during the year in accordance with IFRS 5 Assets Held for Sale and Discontinued Operation

Management has applied significant judgement in determining that Centum T&S Group SA and its subsidiaries represents a separate major line of business/geographical area of operations and meets the definition of a discontinued operation under IFRS 5. This assessment involved evaluating the nature of the business, the relative contribution of the component to the Group's operations, and whether the disposal forms part of a single coordinated plan.

Judgement is required in determining whether the disposal group meets the criteria to be classified as held for sale, including whether:

- the assets are available for immediate sale in their present condition; and
- the sale is highly probable within 12 months.

Significant judgement is applied in determining which assets and liabilities are directly attributable to the disposal group and should be classified as held for sale. This includes consideration of shared assets, corporate allocations, and intercompany balances.

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

39 Gratuity and other post-employment benefits plans

(a) Defined contribution plans

The Group's contribution to provident fund and superannuation fund are considered as defined contribution plans. The contributions are charged to the consolidated statement of profit and loss as they accrue. The amount recognised as an expense towards contribution to provident fund and superannuation fund for the year aggregated to EUR 7,060,143 (March 31, 2025: EUR 7,486,611).

Particulars	March 31, 2026	March 31, 2025
Contribution to pension fund	70,60,143	74,86,611

(b) Defined benefit plans

The Group's contribution to pension plan is considered as post-employment defined benefit plans. The pension plan entitles an employee, who has rendered at least 10 years of continuous service, to receive between one-half and 2 months' salary at the time of retirement/exit. The pension plan is not funded by any plan assets.

Retirement gratuity :

Number of years of service in the company	Retirement taken at the employee's initiative
Less than 10 years	-
Between 10 years and 15 years	1 half month's salary
Between 15 years and 20 years	1 month's salary
Between 20 years and 30 years	1 month and a half's salary
30 years and more	2 months' salary

i. Net benefit expenses (recognized in the consolidated statement of profit and loss)

Particulars	March 31, 2026	March 31, 2025
Current service cost	(12,834)	(41,787)

Discount rate (in %)	3.32%	3.32%
Mortality table	INSEE 2018-2020	INSEE 2018-2020
Salary escalation rate (in %)	3.0%	3.0%
Employee turnover	22.66%	22.66%
Retirement age	68 years	68 years

The estimate of future salary increases, considered in actuarial valuation, take account of inflation, seniority, promotion and other relevant factors such as supply and demand factors in the employment market.

40 Segment information

(a) Information about reportable segments- Disclosure pursuant to IFRS 8 "Operating Segments"

Basis of identifying operating segments / reportable segments:

(i) Basis of identifying operating segments:

Operating segments are identified as those components of the Group (a) that engage in business activities to earn revenues and incur expenses (including transactions with any of the Group's other components); (b) whose operating results are regularly reviewed by the Group's Chief Operating Decision Maker (CODM) to make decisions about resource allocation and performance assessment and (c) for which discrete financial information is available. The accounting policies consistently used in the preparation of financial statements are also applied to record revenue and expenditure in individual segments. Assets, liabilities, revenues and direct expenses in relation to segments are categorised based on items that are individually identifiable to that segment, while other items, wherever allocable, are apportioned to the segment on an appropriate basis. Certain items are not specifically allocable to individual segments as the underlying services are used interchangeably. The Company therefore believes that it is not practical to provide segment disclosures relating to such items and accordingly such items are separately disclosed as 'unallocated'.

(ii) Reportable segments:

An operating segment is classified as reportable segment if reported revenue (including inter-segment revenue) or absolute amount of result or assets exceed 10% or more of the combined total of all the operating segments.

The Company along with its subsidiaries and associates are an integrated business unit which addresses the Electronics System Design and Manufacturing ("ESDM") and accordingly there is only one reportable segment called ESDM in accordance with the requirement of IFRS 8 - "Operating segments".

(b) Geographical information

Geography	Segment revenue ^a		Non-current assets ^{**}	
	March 31, 2026	March 31, 2025	March 31, 2026	March 31, 2025
(i) India	19,93,532	27,25,612	-	-
(ii) Europe & UK	36,62,850	47,58,817	40,269	71,759
(iii) North America	31,38,587	31,08,300	-	28,30,936
(iv) France	2,98,34,042	3,74,83,568	33,88,085	66,74,013
(v) Rest of the world	47,797	12,941	-	-
Total	3,86,76,808	4,80,89,238	34,28,354	95,76,708

^aRevenue by geographical area are based on the geographical location of the customers.

^{**}Non-current assets exclude financial assets and tax assets.

C. Information about major customers

Revenue from external customers are more than 10 % of the company's total revenue amounting EUR as on March 31, 2026 4,669,647 (March 31, 2024: EUR 4,581,364).

41 Discontinued operations

The Board of Directors of the holding company, at its meeting held on February 13, 2026, approved the restructuring of Centum T&S Group SA, including its subsidiaries. The Board has also taken into account that the Company has been admitted into Insolvency Proceedings, and that a court-supervised structured disposal process has consequently commenced.

In accordance with IFRS 5 – Non-current Assets Held for Sale and Discontinued Operations, the net results of Centum T&S Group SA, including its subsidiaries, have been presented separately as discontinued operations. Similarly, liabilities directly associated with assets classified as held for disposal have been disclosed separately.

The results for the previous year / periods have been restated accordingly and the information relating to discontinued operations is as follows:-

The results of Centum T&S Group SA for the year are presented below:

	For the year ended March 31, 2026	For the year ended March 31, 2025
I Income		
Revenue from operations	3,85,81,213	4,80,89,238
Other income	8,05,381	2,16,099
Finance income	-	17,604
Total Income	3,93,86,594	4,83,22,941
II Expenses		
Cost of materials consumed	1,15,35,944	1,57,50,809
Depreciation (increased) / amortization of work-in-progress	6,07,020	3,19,783
Employee benefit expenses	2,34,52,129	2,61,12,897
Finance costs	13,10,113	15,28,086
Development and innovation expenses	21,28,499	25,34,467
Other expenses	48,06,765	50,14,929
Total expenses	4,38,50,560	5,14,60,972
III Profit (loss) before share of profit (loss) of associates, exceptional items and tax (I - II)	(44,63,966)	(31,38,040)
VI Exceptional items (net)	(6,62,679)	(16,31,013)
V Profit (loss) for the year from a discontinued operation (III+IV)	(51,26,645)	(47,72,056)

The major classes of assets and liabilities of Centum T&S Group SA classified as held for distribution to equity holders of the parent as at March 31, 2026 are as follows:

	For the year ended March 31, 2026	For the year ended March 31, 2025
Assets		
Property, plant and equipment	3,16,141	-
Right-of-use assets	25,85,029	-

Diluted, profit/(loss) for the year from discontinued operation	(7.16)	(6.71)

Notes

1. Legal Context and Observation Period

By a judgment of the Commercial Court of Lyon dated March 3, 2026, CENTUM T&S GROUP and CENTUM TECHNOLOGIES & SOLUTIONS were placed under receivership proceedings (*Redressement Judiciaire*). An initial observation period was established through September 3, 2026. In accordance with legal provisions, all liabilities incurred prior to March 3, 2026, have been legally frozen. The management of the entities is overseen by the current directors, assisted by court-appointed administrators (AJ Partenaires and BCM), with the primary objectives of maintaining business continuity and preserving employment.

2. Sale Process (Sale Plan)

Following an assessment of the entities' debt-repayment capacity, the proceedings have moved toward the implementation of a plan for the total or partial sale of assets and activities (*Plan de Cession*, pursuant to Art. L. 642-1 et seq. of the French Commercial Code). Following the bid submission deadline of April 27, 2026, takeover offers were received by the judicial administrators, covering various perimeters (BTS activities, Engineering Services, and Test Enriches). A court hearing is scheduled for June 4, 2026, for the selection of the successful bidder(s).

3. Accounting Principles and Valuation Basis

Given the imminent sale of the activities and the subsequent likely judicial liquidation of the current legal structures following the asset transfer, the "going concern" principle is no longer deemed appropriate for the preparation of the financial information as of March 31, 2026.

Consequently, the Group has applied IFRS 5 "Non-current Assets Held for Sale and Discontinued Operations".

Presentation: All assets and liabilities have been reclassified to specific line items in the statement of financial position ("Assets held for sale" and "Liabilities attributed to assets held for sale"). The net result for the period is presented as a single line item in the income statement.

Measurement: A review of the recoverable amount of the assets was conducted in light of the takeover bids received. The relevant assets were measured at the lower of their carrying amount and fair value less costs to sell. Impairment losses have been recognized to align the net book value of the assets with the estimated disposal prices derived from the bidding process.

4. Subsequent Events and Outlook

The effective transfer of activities will occur following the court's sale judgment, expected in June 2026. Sale proceeds will be allocated toward the settlement of creditors according to the legal order of priority (specifically privileged wage claims and state claims). Following this process, it is anticipated that no residual value will remain for shareholders.

42 Capital Management

The Group's capital management is intended to create value for the shareholders by facilitating the meeting of long term and short term goals of the Group.

The Group determines the amount of capital required on the basis of annual business plan coupled with long term and short term strategic investment and expansion plans. The funding needs are met through equity, cash generated from operations and long term and short term bank borrowings.

For the purpose of the Group's capital management, capital includes issued equity capital, share premium and all other equity reserves attributable to the equity shareholders of the Group.

The Group manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group monitors capital using a gearing ratio, which is total borrowing divided by total capital plus total borrowing. The Group's policy is to keep the gearing ratio at an optimum level to ensure that the debt related covenants are complied with.

Particulars	(in Euro)	
	As at March 31, 2026	As at March 31, 2025
Borrowings (refer note 43)	36,58,034	52,72,387
Less: Cash and cash equivalents (refer note 43)	(23,46,751)	(17,68,351)
Total debts (A)	13,11,282	35,04,036
Capital components		
Equity share capital (refer note 13)	54,05,416	54,05,416
Other equity (refer note 14)	(2,19,34,965)	(1,70,86,097)
Total Capital (B)	(1,65,29,549)	(1,16,80,681)
Capital and borrowings (C = (A+B))	(1,52,18,267)	(81,76,645)
Gearing ratio (D=(A/C))	-9%	-43%

In order to achieve this overall objective, the Group's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period.

No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2026 and March 31, 2025

43 Disclosures on Financial instruments

This section gives an overview of the significance of financial instruments of the Group and provides additional information on balance sheet items that contain financial instruments

The details of significant accounting policies, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised in respect of each class of financial asset, financial liability and equity instrument are disclosed in Note 2.3(b) and 2.3(o), to the financial statements.

(a) Financial assets and liabilities

The following table represents the carrying value and fair value of each category of financial assets and liabilities as at March 31, 2026 and March 31, 2025.

As at March 31, 2026					(in Euro)
Particulars	Fair value through statement of profit or loss	Derivative instruments not in hedging relationship	Amortised cost	Total fair value	Total carrying value
Financial assets					
(i) Investments (other than investments in associates)	-			-	
(ii) Trade receivables			32,97,141	32,97,141	32,97,141
(iii) Cash and cash equivalents			23,46,751	23,46,751	23,46,751
(iv) Other financial assets			43,28,498	43,28,498	43,28,498
Total	-	-	99,72,390	99,72,390	99,72,390
Financial liabilities					

(i) Borrowings			36,58,034	36,58,034	36,58,03
(ii) Lease liabilities			32,18,071	32,18,071	32,18,07
(iii) Trade payables			87,84,639	87,84,639	87,84,63
Total	-	-	1,56,60,744	1,56,60,744	1,56,60,74

As at March 31, 2025

(in Euro)

Particulars	Fair value through statement of profit or loss	Derivative instruments not in hedging relationship	Amortised cost	Total fair value	Total carrying value
Financial assets					
(i) Investments (other than investments in associates)	6,136	-	-	6,136	6,13
(ii) Trade receivables	-	-	53,76,083	53,76,083	53,76,08
(iii) Cash and cash equivalents	-	-	17,68,351	17,68,351	17,68,35
(iv) Other financial assets	-	-	61,91,958	61,91,958	61,91,95
Total	6,136	-	1,33,36,392	1,33,42,528	1,33,42,52
Financial liabilities					
(i) Borrowings	-	-	52,72,386	52,72,386	52,72,38
(ii) Lease liabilities	-	-	44,61,498	44,61,498	44,61,49
(iii) Trade payables	-	-	1,17,70,725	1,17,70,725	1,17,70,72
Total	-	-	2,15,04,609	2,15,04,609	2,15,04,60

(b) Fair value hierarchy

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to Level 3, as described below:

Quoted prices in an active market (Level 1): This level of hierarchy includes financial assets that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities. This category consists of investment in quoted equity shares, and mutual fund investments.

Valuation techniques with observable inputs (Level 2): This level of hierarchy includes financial assets and liabilities, measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Valuation techniques with significant unobservable inputs (Level 3): This level of hierarchy includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part, using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

(in Euro)

Particulars	Fair value measurements at reporting date using			
	Total	Level 1	Level 2	Level 3
March 31, 2026				
Financial assets				
Investments (other than investments in associate)	-	-	-	-
March 31, 2025				
Financial assets				
Investments (other than investments in associate)	6,136	-	-	6,136

(i) Short-term financial assets and liabilities are stated at carrying value which is approximately equal to their fair value.

(ii) Foreign exchange forward contracts and interest rate swaps are fair valued using market observable rates and published prices together with forecasted cash flow information where applicable.

(iii) Management uses its best judgement in estimating the fair value of its financial instruments. However, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented above are not necessarily indicative of the amounts that the Group could have realised or paid in sale transactions as of respective dates. As such, fair value of financial instruments subsequent to the reporting dates may be different from the amount reported at each reporting date.

(iv) There have been no transfers between Level 1, Level 2 and Level 3 for the years ended March 31, 2026 and March 31, 2025.

(c) Financial risk management objectives and policies

The Group's principal financial liabilities comprise loans and borrowings, lease liabilities, trade and other payables. The main purpose of these financial liabilities is to finance the Group's operations. The Group's principal financial assets including trade receivables, other financial assets and cash and bank balances derived from its operations.

In the course of its business, the Group is exposed primarily to fluctuations in foreign currency exchange rates, interest rates, equity prices, liquidity and credit risk, which may adversely impact the fair value of its financial instruments. The Group has a risk management policy which not only covers the foreign exchange risks but also other risks associated with the financial assets and liabilities such as interest rate risks and credit risks. The risk management policy is approved by the Board of Directors. The risk management framework aims to:

- (i) create a stable business planning environment by reducing the impact of currency and interest rate fluctuations on the Group's business plan.
- (ii) achieve greater predictability to earnings by determining the financial value of the expected earnings in advance.

Market risk

Market risk is the risk of any loss in future earnings, in realisable fair values or in future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in interest rates, foreign currency exchange rates, equity price fluctuations, liquidity and other market changes. Future specific market movements cannot be normally predicted with reasonable accuracy.

(a) Market risk- Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's debt obligations with floating interest rates.

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the Group's profit before tax is affected through the impact on floating rate borrowings, as follows:

(in Euro)		
Particulars	Increase / decrease in basis points	Effect on profit before tax
March 31, 2026		
March 31, 2025		
	+50	-
	-50	-

The assumed movement in basis points for the interest rate sensitivity analysis is based on the currently observable market environment

(b) Market risk- Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

Foreign currency exposure

The following table demonstrates the unhedged exposure in USD / CAD exchange rate as at March 31, 2026 and March 31, 2025. The Group's exposure to foreign currency changes for all other currencies are not material.

(in Euro)			
Particulars	Currency	March 31, 2026	March 31, 2025
Trade payables and borrowings (including short term borrowing and long term borrowing)	USD	(5,36,844)	(64,19,966)
Trade receivables and cash and cash equivalents	USD	21,598	12,23,449
Net assets / (liabilities) in USD	USD	(5,15,246)	(51,96,517)
Net assets / (liabilities) in EUR	EUR	(4,77,633)	(48,17,171)

(in Euro)			
Particulars	Currency	March 31, 2026	March 31, 2025
Trade payables and borrowings (including short term borrowing and long term borrowing)	CAD	-	(5,61,435)
Trade receivables and cash and cash equivalents	CAD	2,56,632	12,68,410
Net assets / (liabilities) in CAD	CAD	2,56,632	7,06,975

Net assets / (liabilities) in EUR	EUR	1,65,271	4,55,292
-----------------------------------	-----	----------	----------

Foreign currency sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in USD and CAD exchange rates, with all other variables held constant. The impact on the Group's profit before tax is due to changes in fair value of monetary assets and liabilities. The Group's exposure to foreign currency changes for all other currencies is not material.

Particulars	Change in currency	(in Euro)	
		Strengthening	Weakening
March 31, 2026			
USD	0.50%	2,576	(2,576)
CAD	0.50%	1,283	
March 31, 2025			
USD	0.50%	15,606	(15,606)
CAD	0.50%	0	0

The sensitivity analysis has been based on the composition of the financial assets and liabilities at March 31, 2025 and March 31, 2024 of entities within the Group having exposure other than their functional currency. The period end balances are not necessarily representative of the average debt outstanding during the period.

Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. Financial instruments that are subject to credit risk and concentration thereof principally consist of trade receivables, investments, cash and cash equivalents and derivatives.

The carrying value of financial assets represents the maximum credit risk. The maximum exposure to credit risk was Euro 9,972,390 and Euro 13,342,528 as at March 31, 2026 and March 31, 2025, respectively, being the total carrying value of trade receivables, balances with bank, bank deposits, investments (other than investments in associates) and other financial assets (excluding assets held for disposal).

Customer credit risk is managed by each entity / business unit based on the Group's established policy, procedures and control relating to customer credit risk management. An impairment analysis is performed at each reporting date on an individual basis for major customers. The Group does not hold collateral as security.

With respect to Trade receivables, the Group has constituted the terms to review the receivables on periodic basis and to take necessary mitigations, wherever required. The Group creates allowance for all unsecured receivables based on lifetime expected credit loss based on a provision matrix. The provision matrix takes into account historical credit loss experience and is adjusted for forward looking information. The expected credit loss allowance is based on the ageing of the receivables that are due and rates used in the provision matrix.

Credit risk from balances with bank and financial institutions is managed by the Group's treasury department in accordance with the Group's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

The Group have made certain strategic investments which have been approved by the Board of Directors.

Liquidity risk

Liquidity risk refers to the risk that the Group cannot meet its financial obligations. The objective of liquidity risk management is to maintain sufficient liquidity and ensure that funds are available for use as per requirements. The Group has obtained fund and non-fund based working capital limits from various banks. The Group invests its surplus funds in bank fixed deposit, which carry no or low market risk.

The Group monitors its risk of a shortage of funds on a regular basis. The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans, etc. The Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be medium.

The following table shows a maturity analysis of the anticipated cash flows excluding interest obligations for the Group's financial liabilities on an undiscounted basis, which therefore differ from both carrying value and fair value. Floating rate interest is estimated using the prevailing interest rate at the end of the reporting period.

Particulars	(in Euro)			
	0-1 year	1 to 5 years	> 5 years	Total
March 31, 2026				
Borrowings	2,76,561	33,81,473		36,58,034

Centum T & S Group SA

Notes to the consolidated financial statements for the year ended March 31, 2026

46 Other Statutory Information

- (i) The Group has not traded or invested in Crypto currency or Virtual Currency during the financial year.
- (ii) The Group has not advanced or loaned or invested funds to any other person(s) or entity(ies), including foreign entities (Intermediaries) with the understanding that the Intermediary shall:
- (a) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the group (Ultimate Beneficiaries) or
- (b) provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries
- (iii) The Group has not received any fund from any person(s) or entity(ies), including foreign entities (Funding Party) with the understanding (whether recorded in writing or otherwise) that the Group shall:
- (a) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (Ultimate Beneficiaries) or
- (b) provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries
- (iv) The Group has not been declared as a wilful defaulter by any banks or financial institutions.
- 47 Previous year numbers have been reclassified/regrouped wherever necessary to confirm to current year classifications. The management believes that such reclassifications of items are not material as they would, individually or collectively, not influence the economic decisions that users make on the basis of the consolidated financial statements.

As per our report of even date attached

for SAS YTHAK
Chartered Accountants
Firm registration number:

Pierre Maxime REJOL
Partner

Apparao Venkata MALLAVARAPU
President

Place: Ecully, France
Date: May 12, 2026

Vishwanath Mudegowdara
Managing Director

a) Timing of rendering of services (in Euro)

Particulars	Performance obligation satisfied at point in time	Performance obligation satisfied over time*	Total	Performance obligation satisfied at point in time	Performance obligation satisfied over time*	Total
Sale of products	2,24,28,284		2,24,28,284	2,14,84,602	-	2,14,84,602
Sale of services		1,40,35,850	1,40,35,850	-	2,47,72,686	2,47,72,686
Income from government grants		21,17,079	21,17,079	-	34,29,556	34,29,556
Management fees			-	-	15,21,314	15,21,314
Total	2,24,28,284	1,61,52,929	3,85,81,213	2,14,84,602	2,97,23,596	5,12,08,198

* The Group recognises revenue from these sources over time, using an input method to measure progress towards complete satisfaction of the service, because the customer simultaneously receives and consumes the benefits provided by the Group.

b) Contract Balances: (in Euro)

Particulars	March 31, 2026	March 31, 2025
Receivables		
- Current (Gross)	46,45,531	60,82,048
- Impairment allowance (Allowance for bad and doubtful debts)	(13,48,390)	(1,12,171)
Contract assets		
- Current (Gross)	30,35,488	53,46,916
- Impairment allowance		
- Non current (Gross)	-	11,58,074
- Impairment allowance		(5,31,142)
Contract Liabilities*		
Deferred revenue		
- Current	41,02,044	43,26,511
Advance from customers		
- Current	8,85,747	26,52,049

* A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

c) Revenue recognised during the year: (in Euro)

Particulars	March 31, 2026	March 31, 2025
Arising out of contract liabilities at the beginning of the year	22,99,992	26,18,847
Arising out of advance from customers at the beginning of the year	17,46,302	10,59,327
Total	40,46,294	36,78,174

d) Revenue recognised during the year from the performance obligation satisfied upto previous year (arising out of contract modifications) amounts to Euro Nil

45 Ratio analysis and its elements

Ratio	Numerator	Denominator	March 31, 2026	March 31, 2025	% change	Reason for variance
